PROFILE

Software engineer with **5 years of production experience** building enterprise and government systems in **.NET**. I have delivered **~50 e-services for 12+ Kuwaiti government ministries** and designed a **large-scale logistics platform** for a German company, including AI agents that automate critical operations. I own projects end to end (architecture, backend, frontend integration, Azure deployment and support) and have led a team of 3–4 engineers. I work in small, demo-able milestones and communicate clearly in English and Arabic.

C# / .NET 5–10 · ASP.NET Core & MVC · Clean Architecture · Dynamics 365 / Dataverse · Power Pages · REST APIs · SQL Server · Redis · Azure · Angular · React / Next.js · AI agents & LLMs

EXPERIENCE

GTS: German Logistics Company

2022 – Present · Remote

Software Engineer (Backend & AI)

.NET Core 5–8 · SQL Server · Clean Architecture · Redis · Azure · Angular · REST APIs

- Designed and built a **large-scale logistics management system**: cargo, customs clearance, smart import/export and supply-chain automation.
- Built **AI-driven automation** and a **custom AI agent** plugged into automated flows, cutting manual work in critical operations through intelligent decisions and predictive analytics.
- Integrated **UPS, FedEx, SMSA and Naql** for data exchange and live shipment tracking.
- Scaled the backend for heavy transaction loads with **Redis caching** and modular services; exposed REST APIs for third parties and client/operations portals.

Amek Capital: Microsoft Partner

2021 – Present · Kuwait (remote)

Software Engineer (Enterprise & Government Portals)

ASP.NET MVC · .NET Core 5–10 · Dynamics 365 / Dataverse · Power Pages · SQL Server · Azure · JWT · Redis · Angular / Next.js

- Architected and led backend development of **government e-portals** for citizens, lawyers, entities and officials across Kuwait.
- Delivered **~50 e-services**, from simple forms to complex multi-step approval workflows, for **12+ ministries and agencies**.
- Integrated **Microsoft Dynamics 365** with web portals (custom ASP.NET and Power Pages) and wrote C# CRM plugins, removing manual data entry.
- Implemented JWT / session authentication to government security standards; managed **Azure** deployments and dev/prod parity.
- Led a team of 3–4 engineers for 6 months: code reviews, architecture standards, mentoring.

SELECTED PROJECTS

Ministry of Finance LIVE
Financial services portal for citizens & entities: mofcsportal.azurewebsites.net

KFAS: Kuwait Foundation for Sciences LIVE
Research grant application portal (Dynamics 365 + .NET API): apply.kfas.org.kw

DGCA: Civil Aviation Authority LIVE
Public complaints portal + compliance audit system: kcaa.dgca.gov.kw

Ministry of Justice
6 portals: citizens, lawyers, entities, e-services, power of attorney, contracts

Ministry of Health & Public Health
Complaints, Treatment Abroad (+ mobile API), birth registration, public-health services

Diwan RTRI, Nazaha, Public Prosecution, MOCI, Awqaf, Family Affairs
Right-to-information (~50 e-services), financial disclosure and more

AI assistants
Chat-with-your-database (text-to-SQL), AI agents, OpenAI & local LLMs (Ollama), automated job-hunting agent

Business systems
ERP, laundry management, event booking & employee portal, SAP integration, WhatsApp messaging service

SKILLS

Backend	C#, .NET 5–10, ASP.NET Core, ASP.NET MVC / Web API, Entity Framework Core, Clean Architecture, microservices, background services
Microsoft	Dynamics 365 / CRM, Dataverse, Power Pages, Power Automate, Azure (VMs, App Services), Azure DevOps
Frontend	Angular, React, Next.js, TypeScript, JavaScript, jQuery, HTML/CSS, Tailwind
Data	SQL Server, PostgreSQL, MySQL, SQLite, Redis
AI & Automation	AI agents, LLM integration (OpenAI, Claude, Ollama), text-to-SQL / RAG, workflow automation, Python
Integrations	REST APIs, UPS / FedEx / SMSA / Naql, SAP, WhatsApp, payment & reporting, JWT security
DevOps	Git, Docker, CI/CD, Kubernetes (basics), Postman

EDUCATION & LANGUAGES

B.Eng. Computer Science & Telecommunications, Higher Institute of Engineering and Technology, Tanta (2022)
Arabic (native) · English (professional working)
